**\*Explanation of Terms:**

- Learning Goals: These are the goals you have for what students will learn to do, or to understand, or to know about as a result of taking your class.
- Course Curriculum: This is the content of your course; for example, the readings, activities, assignments, and presented materials.
- Pedagogy: This is the method you use to “deliver” or “teach” the content; for example, do you lecture, have students work in groups, provide them on-line interactions? Engage in authentic problem posing and solving? Do you provide your students learning opportunities through direct instruction, modeling, experience, or a combination thereof? Is your style didactic (traditional “sermon” or lecture), dialogic (interactive and conversational) or dialectic (allowing for argument and debate)?
- Assessment: This is the measurement you use to determine to what extent students have met your course goals.
- Alignment: This is the degree to which there is logical consistency between what you want your students to learn, what you ask them to do in the pursuit of that learning, the pedagogical approach you employ, and the methods or criteria you use to assess them.
- WSU’s Six Goals of the Baccalaureate: These are broad skill or knowledge domains as defined by the President’s Teaching Academy. The Six Goals are: Creative and Critical Thinking; Quantitative and Symbolic Reasoning; Information Literacy; Communication; Self in Society; and Disciplinary Specialty. For more details on these goals see [oue.wsu.edu](http://oue.wsu.edu).
